Why buy recycled?

- Making products with recycled material rather than raw materials helps to conserve resources and energy, prevents pollution and creates jobs.
- Buying recycled ensures that natural resources are not wasted, captures the economic potential of what we throw away, and may promote goodwill among employees and citizens.
- Purchasing recycled content products helps maintain market demand for the materials that we do not want in our landfill and ensures the continuation of recycling programs everywhere.
- It's mandated by the Federal Government and the State of Hawaii

Comprehensive Procurement Guidelines (CPG)

The CPG program is authorized by Congress under Section 6002 of the Resource Conservation and Recovery Act (RCRA) and Executive Order 13101. The procurement program requires the Environmental Protection Agency (EPA) to designate products that are or can be made with recovered materials, and to recommend practices for buying the products. Listed below are the 8 categories of designated products identified in the guidelines:

- [Paper & Paper Products](#)
- [Non-Paper Office Products](#)
- [Transportation Products](#)
- [Vehicular Products](#)
- [Landscaping Products](#)
- [Park & Recreation Products](#)
- [Construction Products](#)
- [Miscellaneous Products](#)

Products Italicized: Made from recovered materials, but are not on the EPA's Comprehensive Procurement Guidelines.
